

Protect Your Property!

The Richardson Police Department has a new partner in the fight against crime. Both **MyThings** and **Trace** are web based resources we have partnered with to combat property theft.

MyThings

MyThings is a storing house where individuals or businesses can record important property data. The website is a safe location where serial numbers and pictures can be stored in the event of a burglary, theft or fire.

This is a simple tool that is free to the public. If you are victimized and your data is already recorded in **MyThings**, you simply export that information into **Trace**.

Trace

Trace is the world's largest database of lost and stolen property. It's free to search **Trace** for stolen goods and free to register your own lost or stolen belongings.

Trace enables any person to search their free database. The site can be used to verify that merchandise is not stolen property. This site is simple to use and accessible from any internet based device.
